

PAIL WASHER

The PW models are designed to wash 5 Gallon or smaller pails. The pail washers can be customer for water or solvent use depending on options added.

We offer our washer series standard with interior and exterior washing.

The PW units are either pneumatic or electrical. SRS manufactures our washer units in Carbon Steel (painted) or 304 Stainless Steel.

Each washer is custom built per each customer's application. Please note that special design requests can be met, even when not listed.

Model PW-4. This unit is either available in electrical or pneumatic and is activated by a push button station in control cabinet.

Models PW-6 through 12 has PLC and touch screens for adjustments setpoints in operations of cycle times.
